Correction to: Vascular suture line wrapping for aortoiliac anastomoses following open surgical repair of infrarenal Behçet's aortoiliac aneurysms

Ahmed Mousa^{1,2*} , Ibrahim Hanbal¹, Alaa Sharabi¹, Mohammed A. Nasr³, Abdelfattah K. Nassar⁴ and Mai A. Elkalla⁵

Correction to: Orphanet J Rare Dis

<https://doi.org/10.1186/s13023-019-1048-y>

Following the publication of this article [1], the authors informed us of a typographical error in the spelling of “ePET-Dacron[®]” in the Background section. The corrected sentence is therefore: “While anastomosing graft to host artery, vascular suture lines has been reinforced with expanded polyethylene terephthalate (ePET - Dacron[®]), polytetrafluoroethylene (ePTFE), omentum, an autogenous vein, or mesh to wrap the vascular anastomoses.”
